Onsite Companion

Automate your construction workflow

Creating a new level of operational efficiency for your business, OnSite Companion is an innovative software platform, bridging the divide between project planning and delivery.

The key benefits

From workflow management and task scheduling to streamlined document handling, OnSite Companion provides a complete end-to-end solution. Providing a comprehensive insight into the progress and history of each job, OnSite Companion saves you valuable time and money on overheads, site management, administration and project lag.

“OnSite Companion has improved our operational productivity by at least thirty per cent by giving us a complete breakdown on every aspect of every job at all stages of the process. Not only are we able to manage tasks and workflow, but also avoid expensive overruns and deliver our projects more effectively. We can also manage the output and productivity of our staff. I highly recommend using OnSite Companion in your business to improve your bottom line.” Peter Holt, Operations Manager, Mimoso Homes

Create more efficiency with less resources

Offering full transparency across each project, OnSite Companion keeps both office and onsite staff up-to-date with all project-related details, in real-time. It also ensures all parties are accountable for delivering on their required tasks.

Accurate and reliable, OnSite Companion plays an integral role in automating project activities, helping you to increase capacity, whilst significantly reducing costs.

Streamline your processes

OnSite Companion manages your operational workflow, from presale and pre-construction through to construction, maintenance and warranty, as well as a soon-to-be-released cloud module for workplace health and safety. Providing a channel for effortless communication, it also integrates seamlessly with DataBuild.
